Order your own copy of the complete *Business & Health* 1996 Executive Opinion Poll

The results of our nationwide survey of CEOs, benefits managers and HR executives—with data that projects to U.S. firms with 20 or more employees—are detailed in a final report, available to our readers for $89.

You'll find:

- Which 16 key cost-control/preventive measures most employers fail to use
- How purchasers rank 13 key health care issues—and why they worry most about rising costs despite flat health care premiums
- How benefits packages vary by region and higher HMO penetration is associated with lower costs and broader coverage
- What (relatively small) changes in benefits packages and big changes in type of coverage employers predict, including the virtual takeover of managed care in coming years

And much, much more.
